

PRP PLANTAR FASCIITIS STUDY

The Fowler Kennedy Sport Medicine Clinic is currently recruiting patients with a clinical diagnosis of **Plantar Fasciitis** who are interested in being included in a study investigating **Platelet Rich Plasma (PRP)** injection to a **corticosteroid** injection for the treatment of plantar fasciitis.

PRP is generated entirely from the patient's own blood.

The patient MAY qualify if they have...

- √ Pain at the plantar fascia origin at the calcaneus
- √ Aged 18-70 years
- √ Acute or chronic

Patients do NOT qualify if they have...

- × Bilateral heel pain
- × Calcaneal fracture
- × Diabetes

If your patient fits the criteria and is interested in learning more about this study, please fax a referral to Dr. Kevin Willits at 519-850-2484
